

Tenaska is excited to be developing the Bluewood CCS Hub, a carbon capture and storage (CCS) project, in South Texas. We recognize the support of landowners, local and regional leaders, businesses and community stakeholders is key to our goal of developing a project that is safe and responsible and that provides an emissions solution that will support regional industry.

To ensure accurate and timely information about the project, we have developed a project website, [Bluewood CCS Hub](#).

We have also further grown our project team and are pleased to introduce Jacob Korte. Jacob is a Houston native with deep roots in Texas. He will be a local presence and point of contact as we continue to advance Bluewood CCS Hub. You can reach Jacob by email at jkorte@tenaska.com and by phone at 512-557-8731.

We are honored to be working in your community. We will continue to grow our local presence as our work advances and provide you with key updates. In the meantime, please don't hesitate to reach out to us with any questions.

Thank you for your support!

Jesse Fruman
Senior Director, Development
